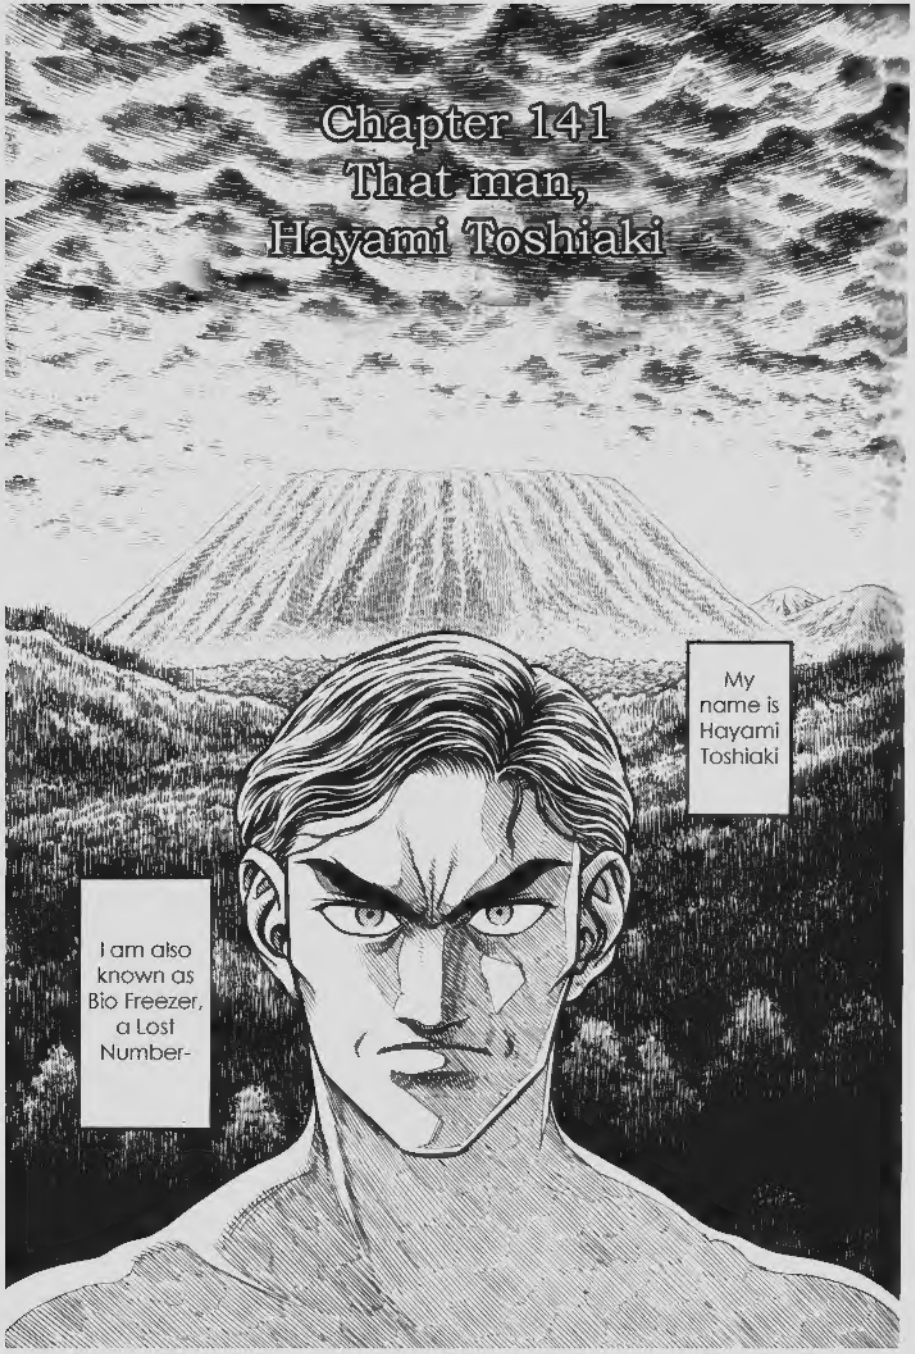
Chapter 141
That man, Hayami Toshiaki



Fukamachi Sho

Currently labeled as the world's strongest enemy, the lead character who opposes Cronos. When Guyver I transformed, the bio-booster armor evolved into the Gigantic to battle the great evil.

Makishima Agito

Host of Guyver III. Was a candidate for the next term of Cronos, but because of his own ambition, he threw it all away. Leads the resistance "Zeus Thunderbolt" in America.

Hayami Toshiaki

A former staff of the lowest level research team of the relic. In the same research team who studied the relic with Odagiri. In retribution to the death of his comrades, he subjected himself to the experimental process acquiring the powers of a "Zoanoid".

Segawa Tetsuro

Brother of Mizuki, good friends with Sho. Involved in an incident with Sho and knows the secrets of Cronos. Has miscellaneous knowledge that supports Sho.

Aptom

The result of further experimentation. He's evolved and has become different from other zoanoids. Lost the mental ties to a Zoalord, and decides his actions on his own.

Segawa Mizuki

A childhood friend of Sho. At first knew nothing about the matter, but eventually became involved with Sho and fell for him. Sho's company has become the foundation of her heart.

Shin R Amniculus

One of the highest branch Cronos, "The12 Holy Warriors". Leads the Japan branch in place of his departed friend Pulukshteri. He offers his complete loyalty to his supreme commander, Archanfel.

Taga Natsuki

Former Classmate of Tetsuro in the SF Club. At Tokyo, after the conquering of Cronos, she continuedto help Tetsuro and the others in various ways.

Kurumegnik

One of the 12 Holy Warriors. Secretly plans to kill Archanfel with Kabral and Jabril. Chasing the secrets of thebio-booster armor. Leader of the three.

Kabral Khan

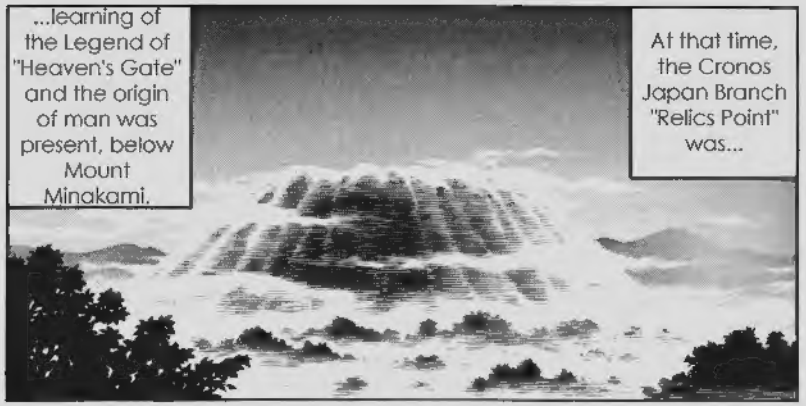
One of the 12 Holy Warriors. Target is to kill Guyver I along with Kurumegnik and the others. Created the "mimicing cells" from his own cell, using this to counter his opponent.

Aso Keisuke

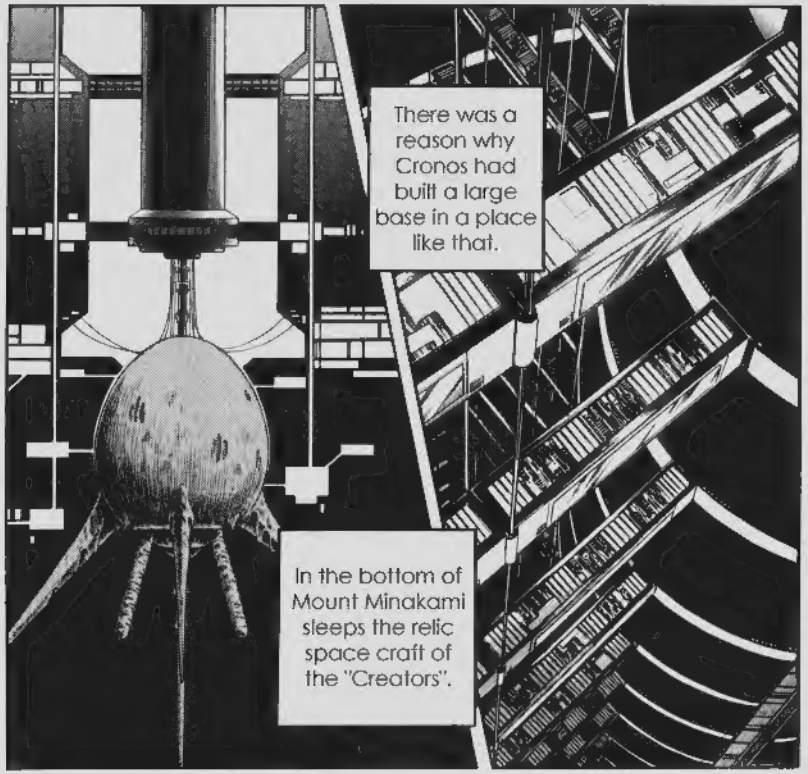
A Professional Photographer. After Murakami, his junior from college, appeared as a Zoalord, he questioned the methods of Cronos, chasing the mystery of Guyver.

Tokiwadaira Tamotsu

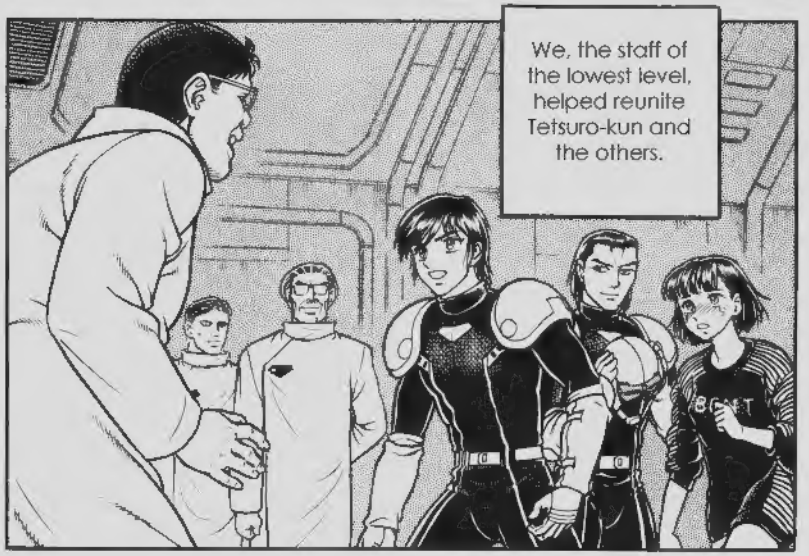
A Cameraman who is the Assistant of Aso. Very naive in relating to people. He innocently follows Aso.



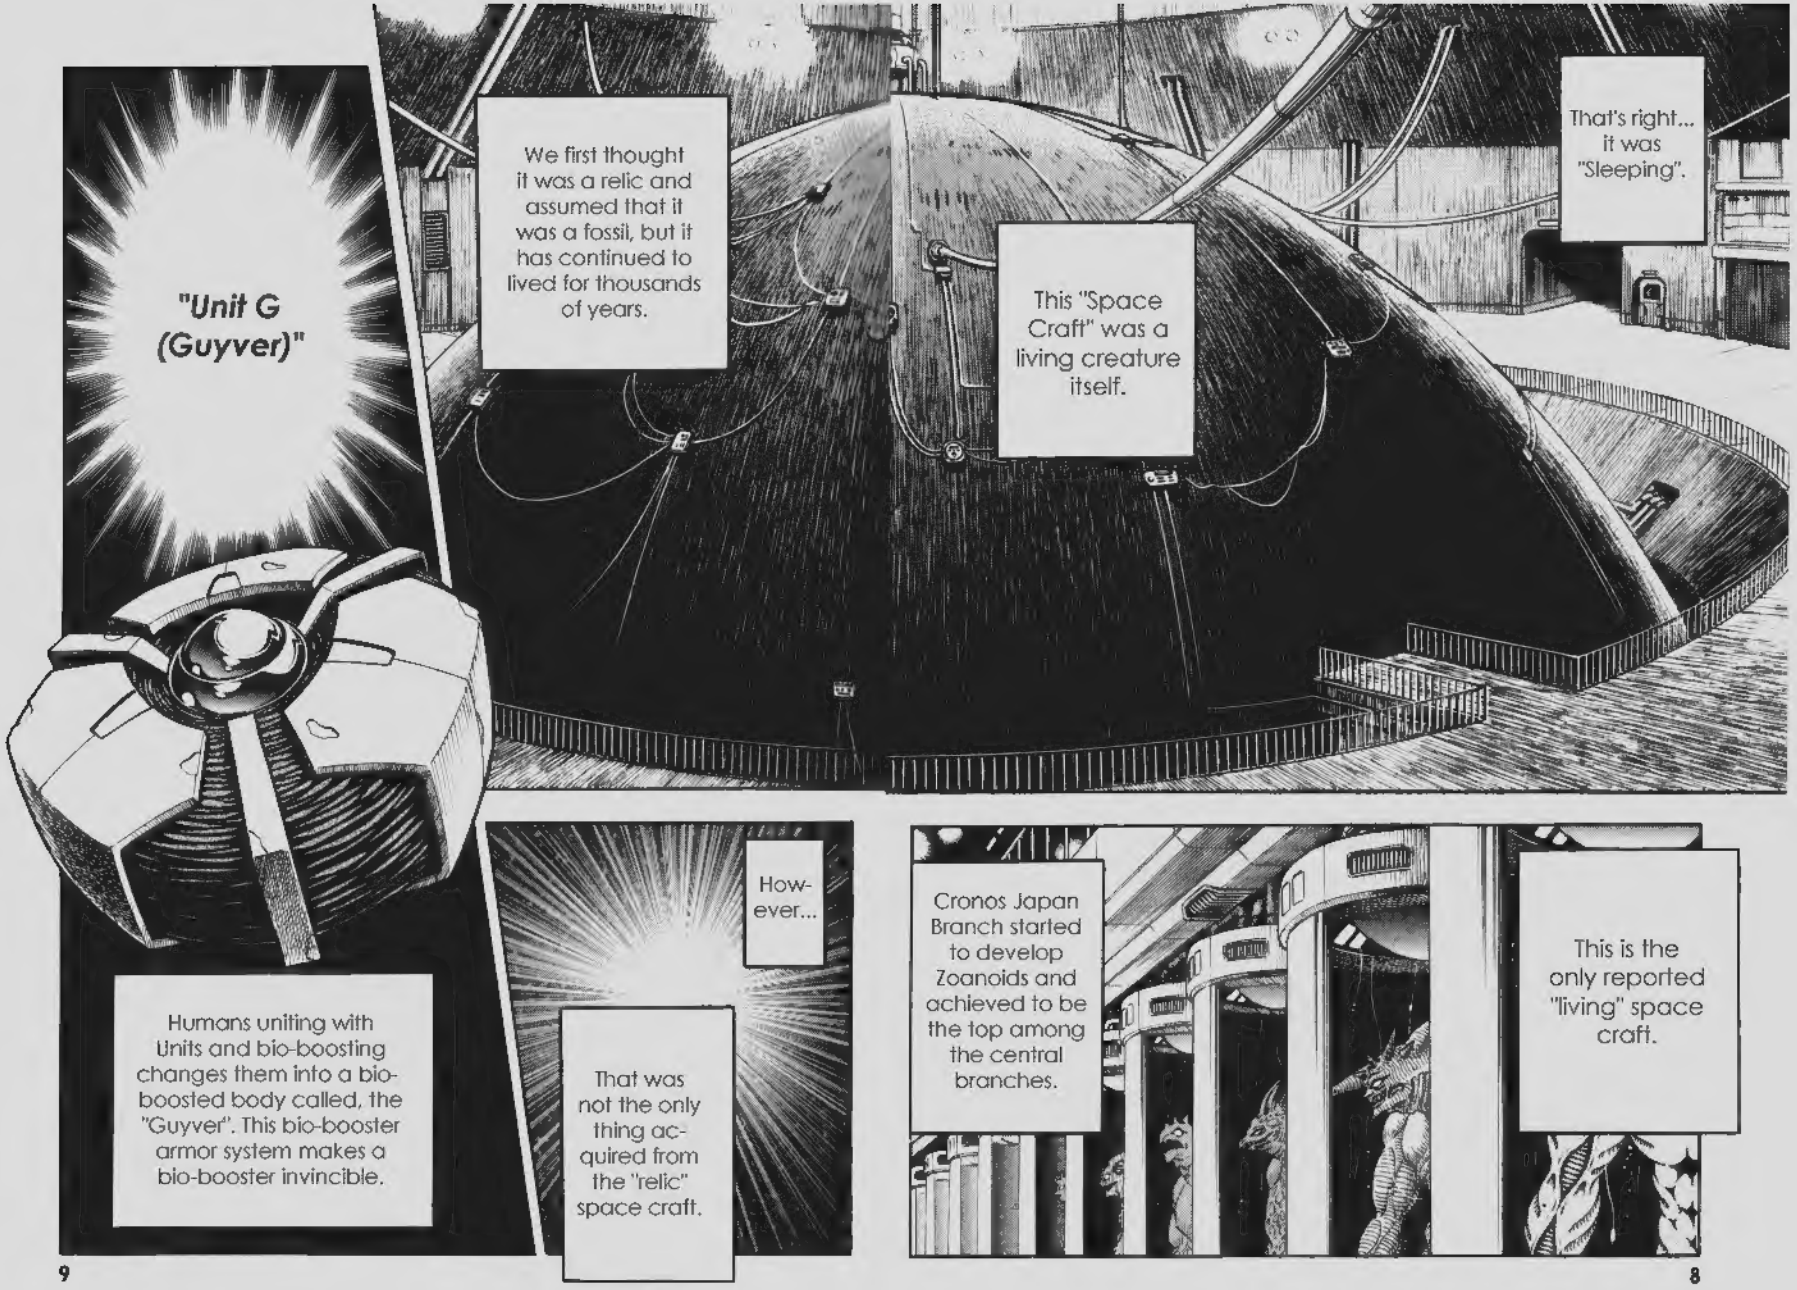
...learning of the Legend of "Heaven's Gate" and the origin of man was present, below Mount Minakami.
At that time, the Cronos Japan Branch "Relics Point" was...



There was a reason why Cronos had built a large base in a place like that.
In the bottom of Mount Minakami sleeps the relic space craft of the "Creators".



GUYVER ADVOCACY



"Unit G (Guyver)"
We first thought it was a relic and assumed that it was a fossil, but it has continued to lived for thousands of years.
This "Space Craft" was a living creature itself.
That's right... it was "Sleeping".
Humans uniting with Units and bio-boosting changes them into a bio-boosted body called, the "Guyver". This bio-booster armor system makes a bio-booster invincible.
That was not the only thing acquired from the "relic" space craft.
However...
Cronos Japan Branch started to develop Zoanoids and achieved to be the top among the central branches.
This is the only reported "living" space craft.

must continue to be supplied with regularly. If not the brain cells will be damaged and lead to death... that devious thing had no method of suppression.

That Virus...

This was the discovery in the space craft.

This unit also plunged the innocent Fukamachi Sho into the hellish road of cruel destiny.

I...no every scientist and researcher that came here continued to serve Cronos in the best way possible.

...the center of the giant whirpool of the insanity of us humans...

In other words, this Mount Minakami was ...

On the outside, they seemed to do research for Cronos.

I belonged to the "Relic" space craft research. Analysis staff also resembled each other but

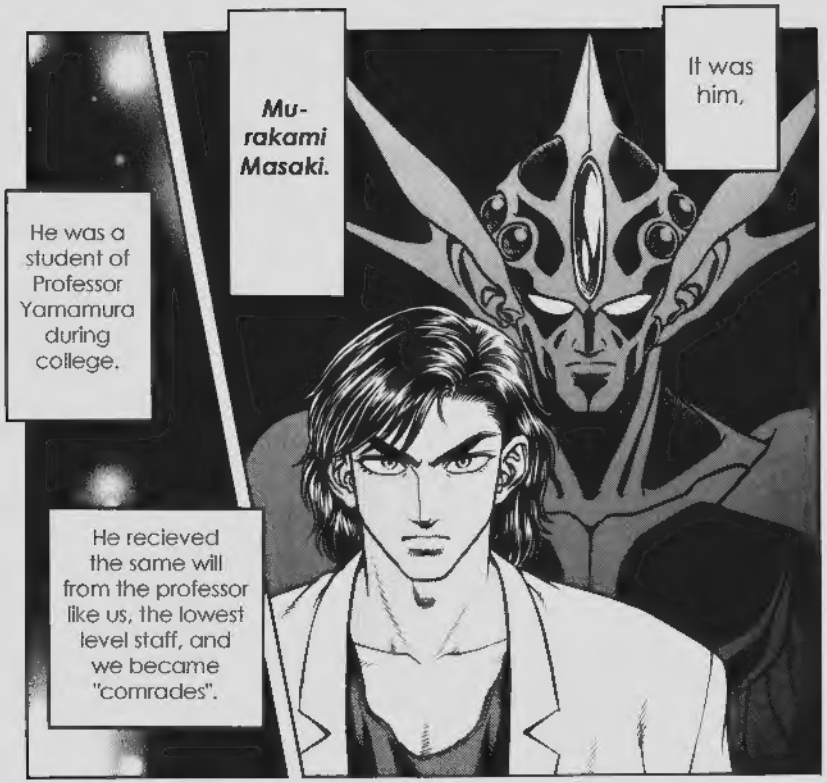
they were different from the other sections of the reseachers.

But in actuallity, they did not lose the values of humanity, but enforced it with a strong will.

This was where I noticed that the Anti-prevention virus was planted.

That's right, I also... 8 years before, when I majored in bio chemistry at a research facility in college.

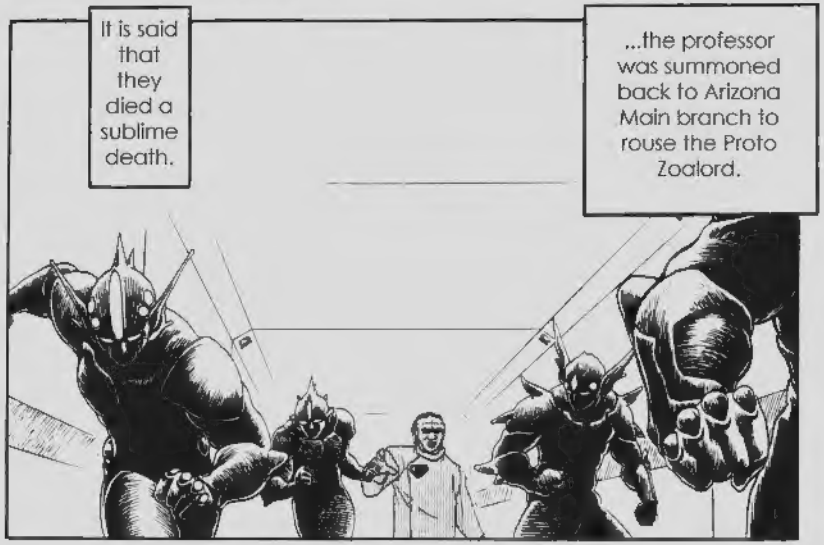
My application was approved in a medical company and I was invited....



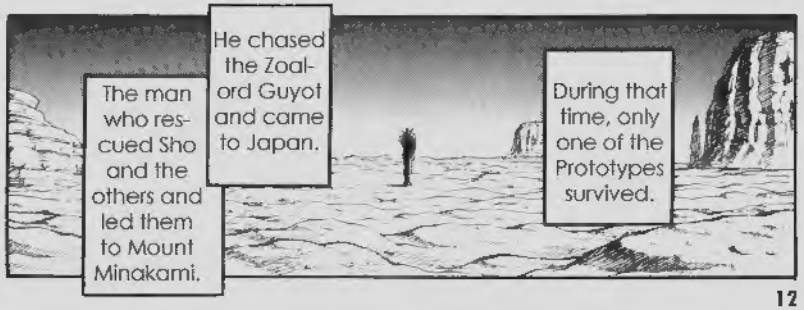
Mu-rakami Masaki.
It was him,
He was a student of Professor Yamamura during college.
He recieved the same will from the professor like us, the lowest level staff, and we became "comrades".

Finally the time for the single great resistance was set into motion.
We, who had allied with the strong force of the 2 Guyvers and the Prototype Zoalord...

Professor Odagiri and the others succeded with their "will to live".
And from the lowest level formed a secret resistance with a burning will received from Professor Yamamura.

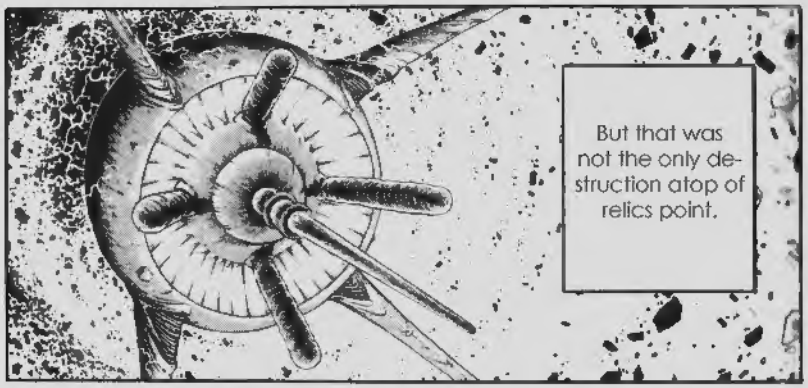


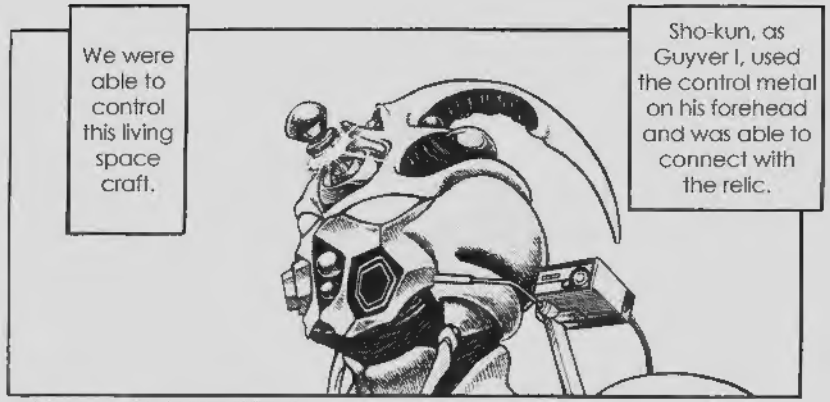
It is said that they died a sublime death.
...the professor was summoned back to Arizona Main branch to rouse the Proto Zoalord.



The man who rescued Sho and the others and led them to Mount Minakami.
He chased the Zoalord Guyot and came to Japan.
During that time, only one of the Prototypes survived.

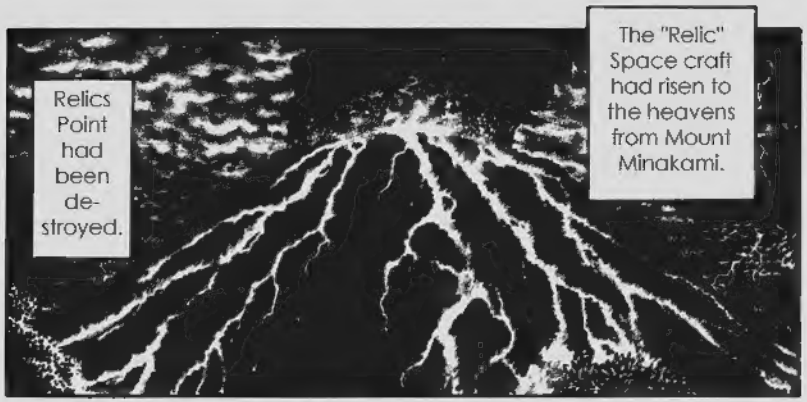
GUYVER ADVOCACY





We were able to control this living space craft.
Sho-kun, as Guyver I, used the control metal on his forehead and was able to connect with the relic.

SFX: Do do do do (rumbling)



Relics Point had been de-stroyed.
The "Relic" Space craft had risen to the heavens from Mount Minakami.

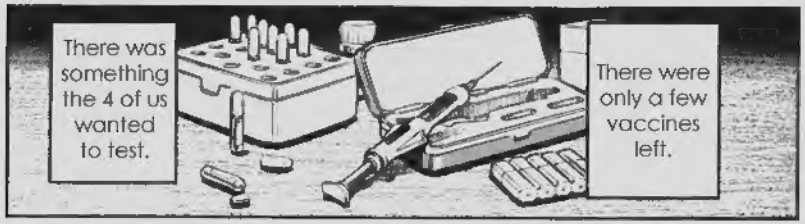
However...

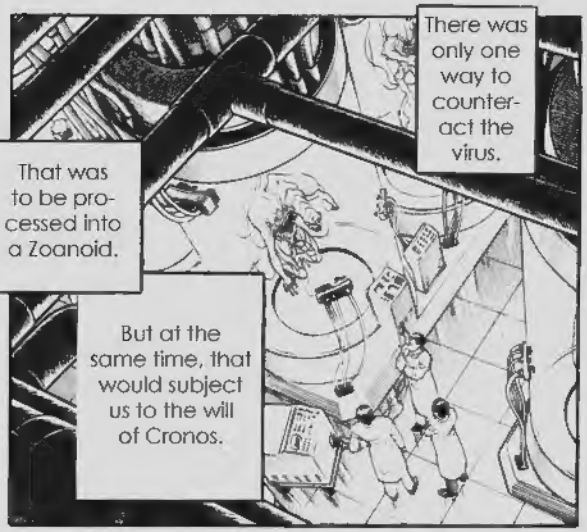
appeared with the highest rank-ing officers, the "12 Holy Warriors" of Cronos.
That was the first time that Cronos Supreme Leader Archanfel,

To defend Murakami-san from Guyot's attack, Odagiri lost his life.

was over-whelmed and had to buy time for the others launch the space craft.
Murakami-san being the Prototype, fighting with the complete type Guyot,

left tokyo and parted ways with Tetsuro-kun and the others who waited for Sho-kun.
We, the lower level staff,
After the control,

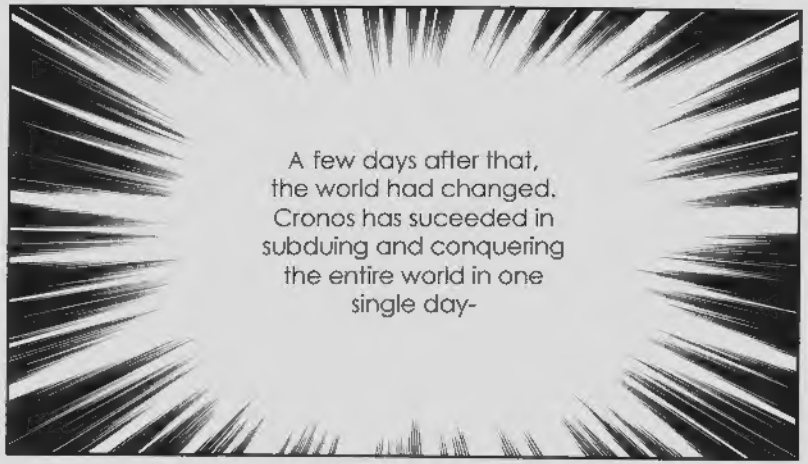




There was only one way to counter-act the virus.
That was to be pro-cessed into a Zoanoid.
But at the same time, that would subject us to the will of Cronos.

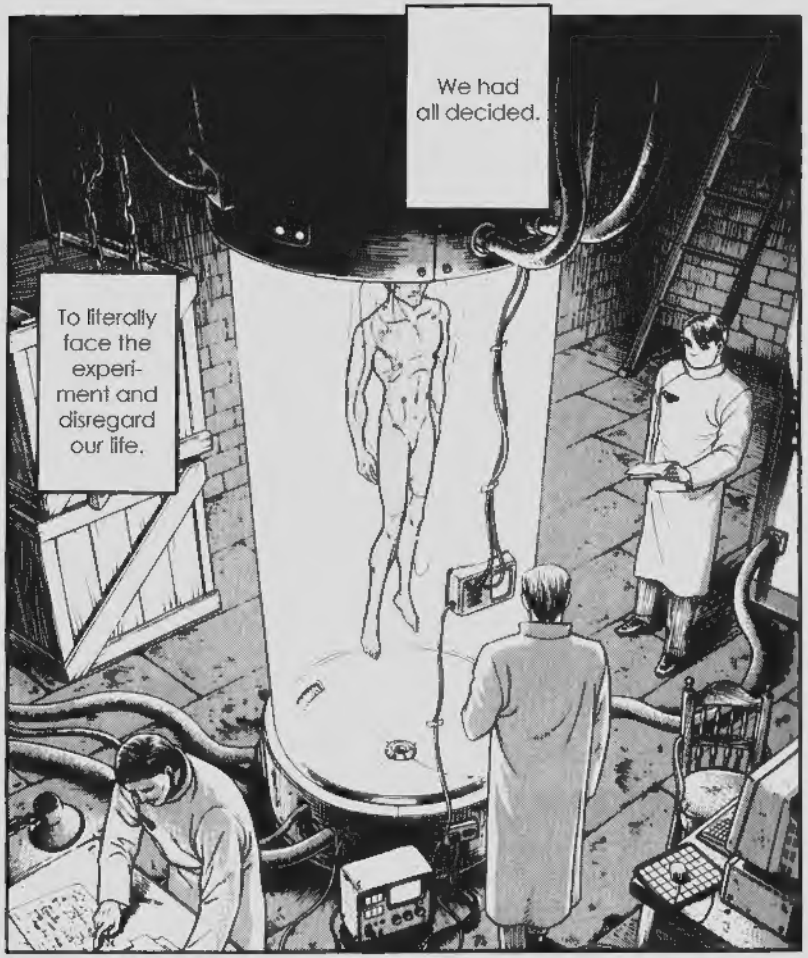
That was to counteract the anti-prevention virus.

Due to the attack of the 12 Holy Warriors, the space craft was destroyed.
It was unknown if Sho-kun and the others were dead or alive.
Archanfel had silenced Guyot.



A few days after that, the world had changed. Cronos has suceeded in subduing and conquering the entire world in one single day-

Therefore the survival rate was extrememly low.
But creating a Lost Number had never been done on pupose... There was no other choice.



We had all decided.
To literally face the experiment and disregard our life.

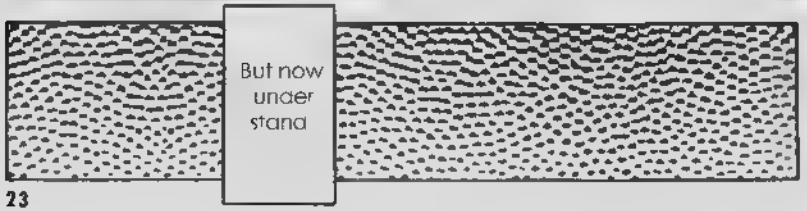
To be a Lost Number means to fail in the first stage of processing... in other words unable to fully become Zoanoids.
That way the mind would not be controlled by a Zoalord.
But there was only one way out of this.
That was to become a "Lost Number".

This was the conclusion we had reached in the last years of our study.
If only we could manage to become Lost Numbers...

We stayed in the laboratory that Professor Odagiri left us.
We subjected ourselves to experimentation.

No matter the time, we call on that power
After that, many difficult things have stood in front of us

The staff of the lowest level with Professor Oaagiri
I always th'nk about it
With the significance that I am the only one left ative



But now under stana

Out of the experimenta data of the last three, I am the only one left
I sur vived

Because of him, I was able to meet up with Tetsuro and the others (at that time Sho and the others was also recuperating)
After that met Aptom

but man aged to help him many times over
Aptom was
saying, "To avenge my com rades" to Sho,

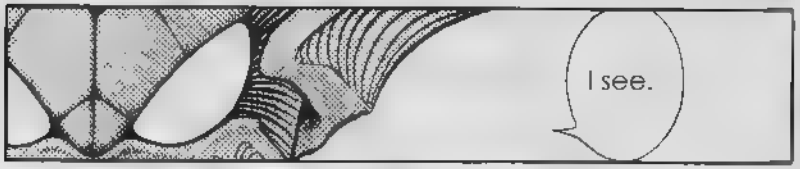
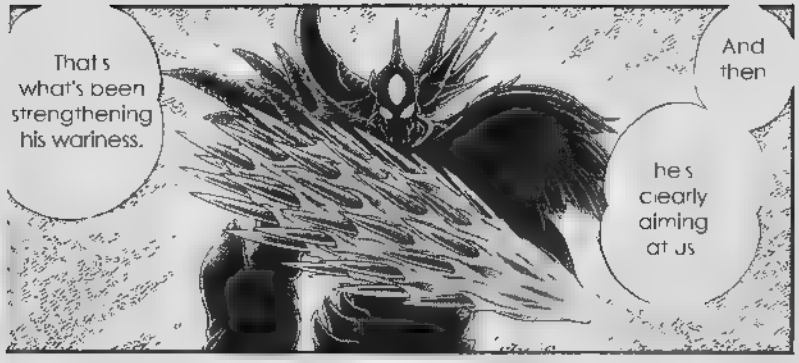
On the other hand, because it is being made by that guy's body system as Hayami san said,



I see.

That s right
in other words when that guy shoots a missle with his left hand ..

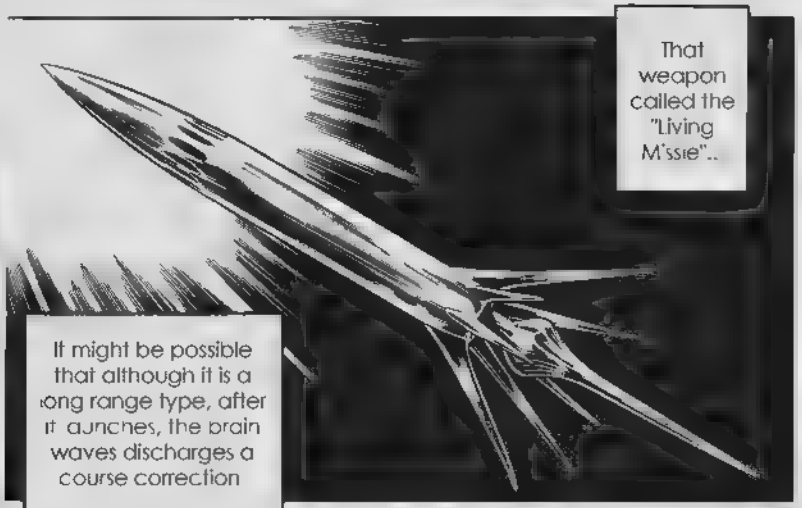
to get close to that guy!!
That's the chance. .



That s what's been strengthening his wariness.
And then
he s clearly aiming at us

We won't know what is to be expected
No .

There's no chance for that guy to obtain the "piece of meat"



That weapon called the "Living M'ssle"..
It might be possible that although it is a long range type, after it launches, the brain waves discharges a course correction

SFX: Shudo do do do (missles firing)

Using the Gravity Controller to rise up in the air and evade the missles...
He might be near you!!

Sho.

These men being "Contro led" are ordinary citizens who were pro-cessed with their own wil .

What happened exactly in Shinjuku..?
However with the government's discrete management putting something out like this .
About the "Secret processing" that Sempai said..
Is this right?
Heh. .
That's why..
..We are going there right now to verify it

They are hearing something only a Zoanoid can hear .
This is just a hunch
There is Something controlling them like telepathy.
What do you mean?
.. all of the processed in Tokyo are being controlled by a strong force by someone
In this region. . no, possibly .
Those who are processed into Zoanoids.
The real truth about 'Free will' does not exist!
Then that means. .
!!
..that's right.

SFX: Goooooo (wind)
